SUMMARY

Data Science graduate and AI Engineer who builds and ships end to end: LLM and RAG applications, computer vision models and MLOps pipelines, backed by deep learning work in PyTorch and TensorFlow.

EDUCATION

Bachelor of Science in Data Science, *Air University, Islamabad* **Completed: June 2026**

SKILLS

LLM & NLP: LLM APIs (Gemini, Groq), RAG, Prompt Engineering, LangChain, LangGraph, ChromaDB, HuggingFace, Voice AI Agents, NLP

ML, Deep Learning & Vision: Python, PyTorch, TensorFlow, Scikit-Learn, XGBoost, YOLOv8/YOLOv11, OpenCV, Pandas, SQL, SHAP

MLOps & Tools: MLflow, Docker, GitHub Actions, AWS, FastAPI, n8n, ElevenLabs, Twilio, Supabase, Vercel, Git

EXPERIENCE

AI Engineer (Contract), *Infomist* **Aug 2026 – Nov 2026**

- **Engineered** Gemini and n8n lead-generation workflows for ChiefAI: a **210-email**, 6-touch pilot with **3.3% bounce**, zero spam complaints and about **45 hours** of manual work removed.
- **Architected** an end-to-end AI voice receptionist: **110-node n8n backend**, 9 webhooks and 10 LLM tools (**ElevenLabs**, **Gemini 2.5 Flash**, Twilio); **100% success** across **1,905 scheduled runs**, **92% completion** on 38 logged bookings, and prompt size cut by **60%**.
- **Strengthened** Veer (AI recruitment) and ChiefAI by securing **2 exposed API endpoints**, fixing 7 workflow bugs and validating voice agents with **9/9 regression tests** and **110+ simulated calls**.

LLM Task Trainer, *Turing, Remote* **Nov 2025 – Dec 2025**

- **Designed** prompts and multi-step task chains with external API tools; **mitigated** hallucinations through **RLHF** evaluation.

Computer Vision & AI Intern, *Scoutrix, Islamabad* **Dec 2025 – Feb 2026**

- **Optimized PyTorch** cricket video models for motion blur and varied lighting; built **MediaPipe** pose extraction and bowler speed estimation.
- **Developed** a bowling action-phase segmentation pipeline using temporal motion tracking and multi-angle camera synchronization.

PROJECTS

Awam Assist | *LangChain, ChromaDB, HuggingFace, Groq (GPT-OSS-20B), FastAPI, React* GitHub | Live Demo

- **Deployed** a production **RAG chatbot** for **15 Pakistani government services** (NADRA, FBR, Passport) with bilingual support and **Speech-to-Text**, serving the FastAPI backend from **Hugging Face Spaces**.
- **Indexed 587 document chunks** in **ChromaDB** (all-MiniLM-L6-v2 embeddings) with streamed answers and **Groq Whisper** speech-to-text for voice questions.

Pakistan Car Price MLOps Pipeline | *XGBoost, FastAPI, Docker, MLflow, SHAP, AWS EC2* GitHub | Live Demo

- **Implemented** an **MLOps pipeline** on **7,995 listings** (XGBoost, **MAPE 10.85%**, **SHAP**, drift detection) with a 5-job **GitHub Actions** retrain-to-deploy cycle on **AWS EC2**.

SentinelAI | *YOLOv8, Roboflow, OpenCV* GitHub | Live Demo

- **Trained** a custom **YOLOv8** weapon detection model on **8,000 Roboflow-labeled images** and shipped it as a live web app supporting static-image and webcam inference.

Campbell's AI Marketing Hub | *XGBoost, KMeans, Groq LLaMA, FastAPI, React* GitHub | Live Demo

- **Caught** a data-leakage bug (implausible **0.9999 AUC**) and rebuilt the churn model with a **time-based split** (XGBoost, **0.8438 ROC-AUC**, 5-fold stratified CV); segmented 2,041 customers into 4 RFM groups with **KMeans**.

AWARDS & CERTIFICATIONS

Winner – Air MLX Hackathon 2025: Achieved RMSE of 0.13 in parking violation risk prediction (multi-table SQL, PCA).

Certifications: Intermediate Python (DataCamp); BA Simulation (Forage); Hadoop, Spark, Power BI (Coursera).
